

DICKINSON ELEMENTARY SCHOOL, built in 1929 will see its last year of service this school year. From 1929 to 1939 this building housed all of the Dickinson students. At that time the present High School was constructed leaving the old building with grades 1-6. In 1954 the Primary and Bacliff schools were built. Dickinson Elementary housed 4-7 until 1957 when the present Junior

High was built next to the High School. For the last three years this building has only had accommodations for grades 5-6.

At present it is the school district's plan to place grade 5 at the Primary School and grade 6 at the new Intermediate School beginning September 1966 and not use this campus for instructional purposes.
